Buttercup Quilting 

SOME FACTS

Custom Edge to Edge quilting is basically like normal edge to edge quilting except you can choose more than one pattern and specify where exactly you'd like those patterns to go!

You can choose up to 8 different patterns. However if you're willing to pay more then you can request more!

There is a chart to help anyone understand how much it costs and for how many patterns you can choose. As long as you know the length and width of your quilt then you can figure out how much it will cost on your own.

If however you would like a quote, you're very welcome to call and find out.
